

PRIVACY POLICY

Sky Runner — Version 2

Effective Date: September 16, 2026

Welcome to **Sky Runner** ("the Game"), developed and published by **Maude's Games**. Sky Runner is a fast-paced Unity-based flying game in which players control a plane and navigate through the sky while avoiding hills, spikes, and other dangerous obstacles. The objective is to continue flying for as long as possible, avoid collisions, and achieve the highest score possible.

This Privacy Policy explains how Maude's Games collects, uses, discloses, stores, and protects information associated with your download, installation, testing, and use of Sky Runner.

Maude's Games is committed to collecting only information reasonably necessary to operate, support, secure, maintain, and improve the Game.

By downloading, installing, testing, or using Sky Runner, you acknowledge that you have read and understood this Privacy Policy.

1. Developer Information

Developer/Publisher: Maude's Games

Contact Person: Natasha Maude Wafula

Support Email: info@seekemhub.com

Business Address:

260 Newport Center Drive

Newport Beach, CA 92660

United States

2. Account Registration

The current version of Sky Runner does not require a player to create a Maude's Games account in order to play. Players are not intentionally required to provide full legal name, username, password, mailing address, telephone number, date of birth, financial information, precise geographic location, government identification, contact lists, biometric information, or social media login information for normal gameplay.

If online accounts or user profiles are introduced in a future release, this Privacy Policy will be updated before those features become active.

3. Information You Voluntarily Provide

If you contact Maude's Games directly for assistance or feedback, you may voluntarily provide information such as your name, email address, device model, Android operating system version, Game version, description of a bug, gameplay problem, testing feedback, screenshots, screen recordings, crash information, or other files or information you choose to include. We use voluntarily submitted information primarily to respond to you, investigate technical problems, improve the Game, or administer legitimate privacy requests. Players should avoid submitting sensitive information that is unnecessary for resolving a support issue.

4. Technical and Diagnostic Information

Depending on the device, Android operating system, Google Play environment, software configuration, and technical requirements of Sky Runner, limited technical information may be generated or processed, including device model, device manufacturer, Android operating system version, application version, device language, screen resolution, device performance information, crash reports, error information, diagnostic information, installation information, application stability information, and compatibility information.

Technical information may be used to diagnose crashes, investigate performance problems, identify software defects, improve device compatibility, improve frame-rate stability, improve gameplay responsiveness, and maintain application security.

Maude's Games does not intentionally use technical diagnostic information to determine a player's real-world identity.

5. Gameplay and Score Information

Sky Runner may store limited gameplay information locally on your device, including current score, highest score, gameplay progress, game settings, sound settings, audio preferences, control preferences, gameplay preferences, and other locally stored configuration information.

Sky Runner's core gameplay involves maintaining flight, navigating the plane through the environment, avoiding hills, spikes, and other hazards, and attempting to achieve a higher score. Information necessary to display or preserve your score may be stored on your device.

Unless an online leaderboard, cloud-save system, online account, multiplayer system, or another network-connected gameplay feature is introduced, locally stored gameplay information is not intentionally transmitted to Maude's Games.

6. Unity Technology

Sky Runner is developed using the Unity game-development platform. The Unity engine may provide the underlying technology used to render graphics, process gameplay physics, manage scenes, handle controls, and operate other technical components of the Game.

The use of the Unity engine does not by itself mean that every optional Unity online service, advertising product, analytics product, or cloud service is enabled in Sky Runner.

[Confirm which Unity services are actually active in the shipped build — e.g., Unity Analytics, Unity Ads, Unity Distribution Portal, Unity Crash and Exception Reporting are enabled by default in many project templates. Any that are active must be named explicitly here rather than covered only by the "future version" language below.]

If a released version of Sky Runner uses a Unity service or another third-party service that independently collects player information, Maude's Games will update this Privacy Policy as appropriate to identify relevant data practices.

7. How We Use Information

Information associated with Sky Runner may be used to operate the Game, provide gameplay functionality, maintain application stability, save applicable local preferences, diagnose crashes, correct software bugs, improve controls and gameplay responsiveness and obstacle behavior, improve device compatibility and game performance, respond to player inquiries, evaluate testing feedback, protect Game integrity, prevent technical misuse where reasonably necessary, maintain security, fulfill legal obligations, and protect the rights of Maude's Games and its users.

Maude's Games does **not sell, rent, or trade personal information** provided directly through Sky Runner.

8. Advertising

The current version of Sky Runner is not intended to collect personal information for behavioral advertising by Maude's Games. If advertisements are introduced in a future version — including advertising networks, advertising identifiers, personalized, contextual, rewarded, interstitial, or banner advertisements — this Privacy Policy will be updated to explain relevant advertising practices before those changes become effective, and any applicable Google Play Data Safety disclosures will be updated to match.

9. Analytics

Sky Runner does not require players to create an account in order to play. If analytics technology is introduced to measure application performance, gameplay activity, feature usage, crashes, session information, or other usage metrics, Maude's Games will update this Privacy Policy to identify the relevant service and explain the categories of information involved. Analytics information, if introduced, will be limited to purposes reasonably related to operating, evaluating, maintaining, or improving the Game unless otherwise disclosed.

10. Third-Party Platforms and Services

Sky Runner may be distributed through third-party platforms such as Google Play. Google

Play, Android, mobile-device manufacturers, operating-system providers, Internet providers, and other independent services may collect or process information under their own terms and privacy policies. Maude's Games does not control information independently collected by these providers.

If future versions integrate services such as online leaderboards, cloud saves, multiplayer functionality, social sharing, user authentication, advertising networks, analytics platforms, payment processors, or push notifications, this Privacy Policy will be revised to reflect those integrations where required.

11. Payments and In-App Purchases

The current Privacy Policy does not represent that Sky Runner collects payment-card information directly from players. If paid features or in-app purchases are introduced, payment information may be processed by Google Play or another authorized payment provider. Maude's Games ordinarily would not receive a player's complete payment-card credentials from an app-store transaction. Any material change in payment practices will be reflected in an updated Privacy Policy.

12. Children's Privacy

Sky Runner is a casual entertainment game and does not require personal information to access basic gameplay. Maude's Games does not knowingly use Sky Runner to solicit personal information directly from children, and does not knowingly collect personal information from children under 13 (or the relevant age of digital consent in your jurisdiction) in a manner that would require parental consent under the Children's Online Privacy Protection Act (COPPA) or equivalent law.

[Confirm the Google Play Console "target age group" and "appeals to children" declarations for Sky Runner. If the Families Policy applies, this section must be expanded to confirm no behavioral advertising and no third-party analytics or ad SDKs that collect persistent identifiers from child users, and compliance with Google Play Families Policy Requirements — this is especially relevant given the confirmed use of Unity, which ships optional ad/analytics SDKs.]

Parents or legal guardians who believe that a child has submitted personal information directly to Maude's Games may contact info@seekemhub.com. We will review the request and, where required by applicable law, take reasonable steps to delete the relevant personal information.

13. Data Sharing and Disclosure

Maude's Games does not sell or rent personal information associated with Sky Runner. Information may be disclosed where reasonably necessary to provide technical services; investigate application problems; maintain application security; respond to a player request; comply with applicable law; respond to lawful court or governmental requests; protect the

rights, property, or safety of Maude's Games, its players, or others; address suspected fraud or misuse; or complete a legitimate merger, acquisition, reorganization, or transfer of business assets subject to applicable law.

Service providers should receive only information reasonably necessary to perform their respective functions.

14. Data Retention

Gameplay information stored locally on your device may remain until the Game is reset, application data is cleared, the operating system removes the information, the saved information is deleted, or the Game is uninstalled.

Information voluntarily provided through customer support may be retained for as long as reasonably necessary to respond to the inquiry, resolve technical problems, maintain legitimate support records, investigate recurring software issues, comply with legal obligations, or protect legal rights. Information that is no longer reasonably necessary may be deleted or anonymized where appropriate.

15. Data Security

Maude's Games uses reasonable administrative, technical, and organizational safeguards intended to protect information under its control from unauthorized access, unauthorized disclosure, accidental loss, improper alteration, misuse, or destruction. No electronic system, mobile application, Internet transmission, or storage technology can guarantee absolute security, and Maude's Games cannot guarantee that information will never be subject to a security incident.

16. International Users and GDPR

Sky Runner may be downloaded and played internationally, including in the European Economic Area and United Kingdom.

Where the General Data Protection Regulation (GDPR) or UK GDPR applies, Maude's Games processes any personal information voluntarily submitted through support communications on the basis of legitimate interests (responding to your request, maintaining and securing the Game) or, where applicable, your consent. Subject to applicable law, you may have the right to access, rectify, or erase your personal information, restrict or object to its processing, and request data portability. Requests may be submitted to info@seekemhub.com. If you voluntarily submit information to Maude's Games, it may be processed in the United States or another jurisdiction in which an applicable service provider operates.

17. Privacy Rights

Depending on your state, country, or region and whether applicable privacy law applies to Maude's Games, you may have rights relating to personal information you have provided, including rights to request access, request correction, request deletion, request information about data practices, request information regarding disclosure, opt out of the sale or sharing of personal information (Maude's Games does not currently sell or share personal information for cross-context behavioral advertising), exercise these rights without discriminatory treatment, withdraw applicable consent, and submit a privacy inquiry. Requests should be sent to info@seekemhub.com. We may request reasonable information necessary to understand or process your request.

18. California Privacy Notice

California residents may have privacy rights under applicable California law (including the CCPA/CPRA), including the right to know, delete, correct, and opt out of the sale or sharing of personal information, and the right to non-discrimination for exercising these rights. Maude's Games does not sell or share personal information collected directly through Sky Runner for cross-context behavioral advertising. California privacy inquiries may be submitted to info@seekemhub.com.

19. Governing Law

This Privacy Policy is governed by the laws of the State of California and applicable United States federal law, without regard to conflict-of-law principles, except where applicable local law requires otherwise.

20. Testing and Pre-Release Versions

Sky Runner may be distributed through internal, closed, open, beta, pre-release testing, or development builds. Testers may voluntarily provide additional information such as gameplay feedback, bug reports, device specifications, screenshots, screen recordings, crash descriptions, performance observations, difficulty feedback, and control-response feedback. Testing information is primarily used to identify problems and improve Sky Runner before wider release. Features and technical configurations may change during development or testing; if those changes materially affect privacy practices, this Privacy Policy will be updated accordingly.

21. Changes to This Privacy Policy

Maude's Games may revise this Privacy Policy in response to Game updates, new functionality, changes to Unity-related services, new third-party integrations, advertising or analytics changes, new online functionality, security improvements, legal or regulatory requirements, or changes

in business practices. The Effective Date at the beginning of this Privacy Policy will be updated when revisions become effective. Continued use of Sky Runner after an updated Privacy Policy becomes effective constitutes acknowledgment of the revised policy to the extent permitted by applicable law.

22. Contact Us

Questions concerning Sky Runner, privacy practices, technical support, testing, or privacy rights may be submitted to:

Maude's Games

Attn: Natasha Maude Wafula

Email: info@seekemhub.com

260 Newport Center Drive

Newport Beach, CA 92660

United States

When contacting us regarding Sky Runner, please include, where appropriate: "Sky Runner" in the subject line, device model, Android version, Game version, description of the problem, and screenshots or screen recordings if helpful.
